

Here are the prompts for the market analyst:

1.Above is a sample data, identify 3 key trends in the data :This prompt was for the identification of key trends in which the AI did well

2.According to the data given could you kindly tell me the best and worst performing department This prompt was for the the identification of the best and worst performing department in which the AI provided two choices: **as per the employee retention** or **the average bonus**

3.According to the data given, could you kindly tell me the best and worst performing department in terms of Average Bonus Percentage This was done in order to specify the type of assessment required in the earlier prompt.

4. Anomaly detection: Identify any outliers or unexpected patterns :This prompt was simple and direct hence did not require any fine tuning.
